

# Energy solutions designed to help your business succeed

**MPower** pays you to reduce your energy usage a few times a year, while helping use reduce peak demand. KCP&L MPower “empowers” companies to save energy during peak summer demand hours. Participating companies receive an annual payment just for agreeing to be “on call” to reduce usage and an additional payment every time they are asked to reduce usage and successfully do so.

**C&I Rebates** offset the cost of identifying and purchasing energy-efficient equipment for use in their facilities with pre-approved rebates from KCP&L. Rebates are available for all customers, including KCP&L’s Small General Service rate customers.

**AccountLink Advantage:** Access your bills, energy usage and transaction records online, pay electronically and even receive e-mail bills.

**Energy Analyzer:** This free online audit tool allows businesses to see where their energy is being used. Complete a profile to see how much you can save on your energy bills and get tips on how to improve efficiency.

**Energy Optimizer:** Save energy and money when KCP&L installs a free Honeywell programmable thermostat at your office or business. This device helps KCP&L manage demand during hot summer days.

**Building Operator Certification:** Participate in our seven-part professional development program for building operators and maintenance staff that focuses on the efficient operation of resources and facilities.

**ENERGY STAR® New Homes:** Builders can receive incentives when implementing energy-efficiency measures during the building stage of qualified new homes.

**ApartmentLink for Property Managers:** Access account information online, pay bills and schedule service transfers.

**Power Reliability:** Protect sensitive equipment and avoid expensive downtime through free surge suppression/power quality audits, power quality monitoring, switchgear maintenance, infrared inspections, harmonic mitigation, uninterruptible power supply (UPS) systems and battery maintenance service.
