PRIMARY-SECONDARY ELECTRIC SERVICE AGREEMENT

In consideration of the mutual undertakings herein contained, the undersigned parties agree as of the _____ day of _____, 19____, as follows:

SECTION 1. The Company shall deliver to the Customer electric power and energy in amounts equal to the Customer's requirements. The customer shall notify the Company of any proposed substantial change in its electrical equipment in sufficient time for the Company to provide such additional facilities as may be necessary. If the Company is required to make an investment in any such additional facilities, the Company may, as a condition thereof, require an extension of the term of this agreement, an increase in the minimum monthly bill or billing demand as may be provided herein, and/or other security for the protection of such investment.

SECTION 2. The Customer shall take and pay for all the electric power and energy required for the operation of all equipment at the premises occupied by it and referred to on the reverse side hereof in accordance with the Company's rates, rules and regulations applicable to the service supplied hereunder which shall, upon the date of this agreement or at any time during the term hereof, be then currently on file and in effect pursuant to State regulatory commission law. SECTION 3. The Customer, if the owner of the premises shall grant or if not the owner of the premises shall obtain on forms furnished by the Company, an easement giving the Company the right to erect and maintain on the premises such electric transmission and distribution facilities as may be required to supply the Customer's requirements hereunder and the requirements of any other customers of the Company from a further extension of such facilities, including the right to set anchors, trim trees, clear the right-of-way and do other things necessary or convenient to the safe operation of the facilities and to enter upon the premises for the purpose of erection, installation, maintenance, and operation and/or removal of any or all facilities installed by Company.

SECTION 4. The Company's undertakings shall be completed by the supplying of electric energy at the point of delivery on the Customer's premises and any appliances or equipment on the Customer's premises required further to transform, control, regulate or utilize such energy shall be furnished and maintained by the Customer.

SECTION 5. This agreement shall be effective as of the day and year first above written; shall become operative on _____, 19____, or on the date of initial delivery of service hereunder, whichever is earlier; and shall continue in effect for a term of _____ (_____) years after the operative date and thereafter from month to month unless and until terminated by sixty (60) days' written notice given by either party to the other.

SECTION 6. This agreement supersedes all prior agreements between the Company and the Customer for the electric service provided for herein and all representations, promises and other inducements, written or oral, made with respect to the matters herein contained. No modification of any provision of this agreement shall be binding unless reduced to writing and signed by the parties hereto, and such written modification of any one or more provisions hereof shall not affect any of the remaining provisions hereof not so modified. This agreement shall not be assignable voluntarily by the Customer.

SECTION 7. This agreement is made in all respects subject to the terms and provisions of the Kansas-Missouri laws and regulations governing public utilities, and all acts amendatory thereof, and to the jurisdiction and authority of the State regulatory commission. Nothing herein contained shall be construed as divesting, or attempting to divest, said commission of any rights, jurisdiction, power or authority vested in said commission by law.

12.01 PRIMARY - SECONDARY ELECTRIC SERVICE AGREEMENT: (continued)

The Company's Option "A":

SECTION 8. The parties recognize that the estimated annual revenue to the Company for electric service to be rendered hereunder will not be sufficient to fully justify the total construction expenditures necessary to render such service. The Customer and the Company agree that the total estimated net cost to the Company of such necessary construction is _____ Dollars (\$ _____).

The Customer shall deposit with the Company at the time of signing this Agreement the sum of _____ Dollars (\$ _____), such deposit being the difference between said total estimated net cost of such construction of _____ Dollars (\$ _____) and a construction allowance of _____ Dollars (\$ _____) to the Customer based upon the estimated annual revenue to the Company from electric service for the permanent load presently connected or to be connected by the Customer. No interest or other charges will be paid by the Company to the Customer for the use of the money deposit advanced, and the Company shall have the right to commingle such money deposit with any of its other funds.

If (a) additional permanent load, not now contemplated by the Customer and the Company, is connected to the facilities of the Customer on the premises covered by this Agreement and served hereunder without cost to the Company for additional distribution facilities to serve such additional load, or (b) new customers creating additional permanent loads are connected at other premises to the line facilities constructed by the Company for service to the Customer under this Agreement without additional line extension and with the installation of only a transformer station and service drop, the Company shall refund to the Customer a portion of said money deposit in proportion to the estimated annual revenue from the additional permanent loads; provided, however, that the total amount refunded to the Customer shall never exceed the Customer's money deposit herewith, and provided further that no refund shall be made after _____ (_____) years from the effective date of this Agreement.

The Company's Option "B":

SECTION 8. The parties recognize that it will be necessary for the Company to build the additional electric line and other facilities hereinafter described in order to furnish to the Customer the electric service to be delivered by the Company under this Agreement and that the Company would lose an appreciable part of its investment in such additional line and facilities if the Customer fails to perform its obligations under this Agreement.

The Company shall _____

construct and install the additional facilities as indicated on the attached drawing No. _____, designated as Exhibit A, necessary to provide _____ phase, _____ wire, _____ volt service in accordance with this Agreement.
